

DIMOCO Research Center GmbH is a successful fintech company that combines payment, mobile and software development in a holistic sense. We create all-encompassing technical high-availability software platforms.

These platforms enable us to offer our customers 24/7 payment and messaging services, which are developed in cooperation with global telecommunications companies, card systems, content publishers, merchants and large enterprises.

We use the latest technology stack and capture the legal requirements of the financial industry as well as the territorially applicable requirements in combination with the needs of our customers.

Learn how we use mobile devices to process digital payments in real time, making it easy for our customers worldwide to process any payment method.

In our international team of 20+ nations you can expect a lot of room for your personal touch and personal responsibility. Flexible working hours and home office options support your work life balance. If you see yourself as an important part of a young and motivated team in a modern environment, then you are right with us!

Due to the increasing demand of our services, we are now looking for an experienced

QA Test Engineer (f/m/d)

Your mission

We are looking for an experienced QA Test Engineer to join our team in Brunn am Gebirge. The successful candidate will work closely with developers and other team members to develop and deliver high-quality software products.

Your tasks in more detail

- Creating, planning, and executing manual and automated tests
- Identifying and tracking bugs and errors in the software
- Developing test plans and strategies that meet requirements
- Working closely with developers to solve issues and improve software quality
- Conducting code reviews and assisting with bug fixes
- Performing risk analysis
- Developing and maintaining test automation frameworks and tools
- Participating in meetings to plan and coordinate projects

Your skills

- Bachelor's degree in Computer Science or a related field
- At least 2 years of experience as a QA Test Engineer
- Experience in planning and executing manual and automated tests
- Basic knowledge of the Java or Groovy programming language
- Experience with test automation frameworks such as Selenium or Appium
- Familiarity with agile development methodologies such as Scrum or Kanban
- Excellent communication and problem-solving skills
- Ability to work in a fast-paced and agile environment

DIMOCO's promise

- An extensive and independent field of activity with versatile tasks is waiting for you. Short communication ways, as well as a high level of autonomy.
- We support you: You will receive comprehensive training on our products and systems, as well as a DIMOCO tutor to help you get started.
- Performance-oriented team spirit and self-motivated working environment - passion and creativity are the drivers in our company.
- Flexible working hours and home office options support your work life balance
- A modern office environment in Brunn am Gebirge (Campus 21/near SCS) with a free shuttle bus from and to Vienna is waiting for you.
- Of course, you will receive a competitive compensation package based on your experience, which we will be happy to discuss with you personally. For the sake of completeness, however, we would like to mention that the minimum salary package starts at a gross yearly salary of around EUR 56.000,-.

One application – a billion opportunities!

We look forward to receiving your application: dimoco-research.com/job-ad-qa-test-engineer/
